

In an attempt to maintain high quality and uninterrupted Online Banking service, we are providing our valued customers with some important information provided by Microsoft.

*As you may have heard, Microsoft is no longer supporting most versions of Internet Explorer prior to version 11. The same can be said for Google's Chrome browser, which has also been discontinued on XP and Vista.*

*Support for XP ended in April 2014 and Vista support is due to end on April 11, 2017. Although there is still some life left in Vista, software developers are focusing more of their energy on newer platforms, meaning the software they make isn't supported for XP or Vista.*

*This certainly applies to web browsers – older browsers may still work on your PC, but without security patches they'll be open to hackers who can exploit vulnerabilities.*

Our Online Banking provider continually updates and enhances their online banking product. In keeping with this ongoing effort and to align with Microsoft's end of support for versions of Internet Explorer older than 11, they have updated the browsers that will be supported for online banking. The Internet Browsers that will be supported by our Online Banking provider **beginning on May 24, 2016** are:

Supported	Notes
 Mozilla Firefox 44 and 45	Considered to offer an optimal Online Banking Experience
 MS Internet Explorer 10 and 11	Should not be used in Compatibility Mode
 MS Edge13 and 14	
 Google Chrome 48 and 49	
 Apple Safari 8 and 9	

In an attempt to provide you with the safest and securest measures to access your account information via online banking, we ask that you safeguard yourself by making sure you are using the most current internet browser supported by your operating system.
